# Why should I have a LifeCard?

## Safe & Sound!

My LifeCard is my personal electronic health record

LifeCard stores all of your health information in one secure location. Think of it as your secure digital folder where you can store details of your health providers, health funds, any allergies, current medications, your family medical history, relevant test results, consultation summaries, emergency contacts, medical appointments, prescriptions and medication reminders.

All of this in ONE SECURE LOCATION!

## Peace of Mind!

LifeCard provides access to emergency health information

In case of emergency, take comfort in knowing that your emergency medical information such as next of kin, allergies, medical conditions and health fund details may be made available to the emergency and healthcare professionals looking after you.

LifeCard is invaluable for those who travel, live alone, have school-age children or care for people who may need special medical assistance.

## Managing my Health!

LifeCard lets me partner with my healthcare provider

LifeCard gives you the ability to share information securely with healthcare providers.

You can also choose to have a summary of your health professional visits sent straight to your LifeCard account.\*

*\*participating healthcare providers*

## Health can be Rewarding!

LifeCard rewards me with benefits

LifeCard rewards you for looking after your health! As a LifeCard member, you can take advantage of benefits offered by LifeCard partners.

## Easy to Apply!
