

### Global Health awarded national tender from headspace

Global Health Limited (ASX:GLH), formerly Working Systems Solutions Ltd (ASX:WSS), has signed a contract with **headspace** ([www.headspace.org.au](http://www.headspace.org.au)) to implement MHAGIC (Mental Health Assessment Generation and Information Collection) for 150 users in 30 sites nationally.

**headspace** is Australia's National Youth Mental Health Foundation currently with 30 services located in each state and territory. **headspace** is delivering improvements in the mental health, social wellbeing and economic participation of young Australian's aged 12-25 who may be experiencing mental health and/or drug and alcohol issues.

**headspace** is funded by the Australian Government under the Promoting Better Mental Health – Youth Mental Health initiative.

Under the contract, Global Health will supply 150 user licences of the MHAGIC software along with implementation and training services. Global Health will also provide a data warehouse to store the data collected across the 30 sites nationally. The data warehouse will be used by headspace for research and reporting purposes.

#### About MHAGIC

MHAGIC (<http://www.global-health.com/mhagic/>) has been developed according to specific needs of Australian Mental Health practitioners providing a broad set of features for the administrative and clinical needs for management of referrals, assessment, evaluation and record keeping requirements of mental health clients.

MHAGIC is deployed in private Mental Health practices, statewide in the ACT Health Department and over 15% of GP Divisions across Australia.

One of MHAGIC's unique product features is the use of "wizards", which use tick-box templates that are used to accurately and quickly collect comprehensive clinical information, automatically generating a report using the correct psychiatric specialist vocabulary.

"MHAGIC is generating significant sales momentum and recognition as the benchmark for shared Electronic Medical Records and team-based care. The growing demand by governments and health funds for better models of chronic disease management will underpin further growth in e-health solutions worldwide. Following on from our recent success in government-funded Diabetes Management trials in Victoria and Western Australia, and secure clinical messaging across Tasmania, Global Health is emerging as the market leader for solutions that connect clinicians and consumers for shared-care health and wellness management" said Global Health CEO, Mathew Cherian.
