Global Health signs \$3M contract over 5 years with ACT Health

22 December 2015: Global Health is pleased to announce the signing of a contract with ACT Health worth \$3M over an initial 5 year term.

The contract covers the licensing, implementation and ongoing support of the MasterCare Electronic Medical Record (EMR), MasterCare Data Warehouse software and reporting platform for the ACT Mental Health, Justice Health and Alcohol & Drug Services (MHJADS) Electronic Clinical Record (ECR) project.

MHJADS will use the MasterCare suite to integrate its clinical record management across all operations. This project will allow Alcohol & Drug Services and Justice Health Services to replace their paper-based clinical records, whilst Mental Health Services will benefit from an upgrade in their electronic clinical record capabilities.

The ECR project for MHJADS is a key project within the Health-e Future Program by ACT Health.

MasterCare is an industry-leading software solution which supports the business and clinical operations of hospital and community healthcare centres by collecting, managing and accessing clinical and patient information. MasterCare's competitive position is strengthening in a healthcare market increasingly focused upon improving efficiencies and reducing patient risk. Key benefits for MasterCare users include:

- Ensures clinical information is integrated into a single source;
- Improves cross-service clinical handover and communication;
- Improves complex multi-disciplinary care planning and service delivery;
- Improves communication pathways for referrals and clinical handover to other healthcare services;
- Supports staff in daily operations management through improved data/report access;
- Ensures greater collaboration and efficiencies between healthcare professionals.
