Appointment of GM for Asean Business Development

Global Health is pleased to announce the appointment of Ms Islah Ishak as Regional General Manager for the Asean markets which has a population of over 625 million people. Islah has joined the senior management team with a background of over 20 years in business development in the medical and technology industries in Malaysia.

Islah's most recent role was as the Director of Investment and Trade for the Victorian State Government South East Asia Business Office in Kuala Lumpur, with a specific focus on developing trade opportunities in the Biotech, Medtech, Pharmaceuticals, Health and Aged Care segments.

As Regional General Manager, Islah is tasked with developing direct sales opportunities and channel partners across the Asean region including Malaysia, Singapore, Indonesia, Vietnam, Thailand, Philippines, Cambodia and Myanmar. Global Health believes that the growing economic prosperity, ageing population and sensitive public healthcare policy in the Asean region are the key demand drivers for better healthcare and infrastructure.

Islah said "The model of a connected, consumer-centric health care ecosystem which is at the core of Global Health's vision, has the potential to radically disrupt health care in the Asean market. When multiple healthcare providers work in tandem with each other and their patients – everyone gets a much better experience and outcomes improve in leaps and bounds for all participants – consumers, providers and funders. The mobile-first design of Global Health's platforms is especially relevant in Asia where mobile telephones are central to daily living and mobile Internet coverage reaches everyone."

The new senior role based in Kuala Lumpur was established following encouraging interest in Global Health's software portfolio from a variety of parties in the Asean region. With 60% of the world's population in Asia, the highest growth rates in the world and a rapid improvement in living and lifestyle conditions, this is a strategic and significant growth opportunity for the Company.
